---

### Achievements

100% undergraduate scholarship.  
A part of Dean's list since Fall 2021.

---

### Work Experience

#### IT Internship at 'Colgate-Palmolive'

Summer'2022

I created Material Extend Application on SAP Fiori, through which the users can request the availability of a certain material at a particular storage location from the respective users.

#### Social Internship at 'The Bridge School'

Summer'2020

Expanded their outreach by helping them in gaining 100 followers on social media platforms during a week. I also updated the curriculum of Grade I by thorough research work.

---

### University Project/ Academic Reports

Developed an Ecommerce Website in Database System course in a group of 4.

- I created the backend of this website using Node js while incorporating complex SQL queries.

Designed the "Chess and Checkers" game in the Software Engineering course.

- I led a group of 8. Learned software specifications, creation of paper and digital prototypes, and UML designing. Developed team management and leadership skills.

Build a text to PDF converter using Latex.

- Created a text to PDF converter in JAVA that takes input in text fields and generates a latex script that can generate a PDF.

Developed Utility Service Provider Website in a group of 3 using MERN stack.

- I created the backend of this website using Node js and MongoDB as database.

Automated Candidate Shortlisting as Final Year Project (ongoing)

- Creating this website using MERN stack, while being a part of FYP Accelerator offered by 10Pearls.

---
